

MLT 126 : Immunology and Serology

This course introduces the immune system and response and basic concepts of antigens, antibodies, and their reactions. Emphasis is placed on basic principles of immunologic and serodiagnostic techniques and concepts of cellular and humoral immunity in health and disease. Upon completion, students should be able to demonstrate theoretical comprehension and application in performing and interpreting routine immunologic and serodiagnostic procedures.

Credits 2

Class Hours 1

Lab Hours 2

Clinical Experience Hours 0

Prerequisites

MLT-110 and Current Program Status
