

Curriculum Student Registration

The college provides ample opportunity for students to register for classes and encourages students to maintain regular advising appointments with advisors beyond the registration period. Exact registration times and dates are announced in advance through campus publications. Currently, enrolled students should schedule an appointment with their advisor to receive advice concerning their selection of courses and degree progress. New or returning students should schedule an appointment with a student services advisor to register for courses and to be coded into a program of study. ([Procedure 3.01.10](#))
