

General Education Outcomes

The general education outcomes with explanations are as follows:

Demonstrate college level communication skills (writing and speaking). Communication skills are those learned behaviors which enable individuals to effectively gather, assimilate, process, and disseminate information. Demonstration of the skills indicates that students can write and speak at the college level.

Demonstrate quantitative and scientific literacy. Quantitative and scientific literacy refer to understanding the use of processes, procedures, or evidence to solve problems or make effective decisions. Demonstration indicates students solve problems or make decisions employing processes, procedures, data, or evidence.
